Restat, ut Tibi, Prasul amplissime, qui me, ut hac publici jurls facerem, hortatus es, qua gura ea collegerim, & qua methodo digeoserim, nanc breviter exponam. Omnia vocabula, cujuscumque note essent, dimmodo a probatis auctoribus, quos vulgo classicos nominant, fuerint usurpata, quæque Fereillisi diligentiam effugerant, sedulo conqulsivi, eaque hoc præposito signo * notavi; plutima audorum testimonia perperam citata, quo reapse loco essent quarenda, indicavi; monoullas verborum notationes vel ex Graca, vel ex Hebraica lingua, qua magis rationi consentaneze esse videbantur, addidi; verborum parricipia tum activze, tum passivze significationis & formz szpissime adjunxi, propterea quod experientia ipsa cognoveram, eos, qui apad oos Latine scribunt, ab ils religiose abstinere, quorum sulla apud idoneum auctorem ipsis suppererer auctoritas. Gradus nominum & adverbiorum, qui aut in Forcelliai Lexico deunt, aut ex inferioris Latinitatis auttoribus deprempti suot, non raro adjeci, vel superioris atatis restimoniis confitmavi. Quemadmodum vero ea fuir Forcellini cuta & diligentia, ur vocabulorum exempla rum ex provæ, rum ex vorsæ orationis scriptoribus desump:a apponeror, ita quoties aliquid bujusmodi ab oo omissum aolimadvetti, tosies addere non dubiravi. Incertæ auctoritatis voces notavi, ut ab ii: usurpandis cavetet, qui vellet Latine serlbere. Omissas passim verborum quantitates, quibas legitimas pro-pantiationi consiliur, dillgentissime revocavi. Sed & Istuc animadvertendum existimo, me plutima vocabula, que inter barbara a Ferrelline rejecta sunt, Romana civitate donasse. Ea enim barbara tantum censenda sunt, que vel Greca cum sint, Latine scribuntus, vel nullius aut cette minus Idonei audtoels sanctione firmantur: hec solam improbanda & expungenda; ectera- etlamsi infime norm, afferri tamen possunt, ut de corumdem pretio cetto aliquando courtet. Quotiescumque ltaque vocem aliquam ab iis auctoribus, quos in classicorum album tum Fercellians, tum alui Lexicographi admiserant, usurpatam fulsse deprehendi, mihi nulla fuic religio illi lu-i in Appendice locum facere. Sicut enim olim Tiberio imperatori licuit peregrinis quidem homioibutamen corum verbis civitarem donare, ita nemini hoc tempore licere puto, verba, quibus Latinà scriptores usi fulssent, e Bomanæ civitatis possossione exturbate. Lexicographi enim est, vocus colligere, apre disponere, & tette interpretari, nullum vero de iisdem judicium ferre, nisi luc ab idoneo illius temporis scriptore prolatum fuerir. Te etiam ad extremum monitum velim, me in primis alphabeti litteris plutimas voces, quas ex Inscriptionibus, seu ex Litholexico ab Emmenuele Compologo Neapoli edito an. 1782. excorperam, inseruisse; deinde veto processu operis, cum suspecta mibi fierer illarum Inscriptionum ou Terrir, utpote que barbara vocabula & hactenus inauditas historias completterentus, ab iiudem mihi abstinendum existimasse, easque in postetiotibus litteris prorsus omisisse,
